

Christophe Michel biography

Christophe Michel Medical Devices and Connected Health

Christophe MICHEL is Alira Health Associate director for Medical Devices and Connected Health since March 2021.

After an academic researcher position, Christophe spent most of his 20 years experience in the clinical area. He has held managing positions as head of clinical evaluation and clinical affairs in companies like global imaging or robotic surgery companies. Christophe has worked on projects across multiple therapeutic areas, mostly in HTA of therapeutic and diagnostic medical device, covering topics like innovative and connected devices, vascular access, oncology and gynecology. Christophe gives a lot of attention to genomic diagnostics, predictive and personalized medicine.

Centered on evidence-based medicine, Christophe has focused on real life evidence gathering, protocols validation, outcomes research, and payer financing pathways for innovative therapies. He has a special focus on the holistic overview of health technologies, from the conception to procurement and pricing.

Christophe graduated from Nancy university school of medicine with a Ph.D. in biomedical engineering , major on heart failure and experimental surgery. He has later completed DIU FIEC degree for clinical investigator/evaluator with clinical investigations assignments on anti protease trials in C-type hepatitis and in rare genetic myopathies.
