

Javier Quiles del Río.

SERGAS – Galician Healthcare Service

Since 2019 Javier is Head of IT Department at Galician Healthcare Service - Area Sanitaria de Ferrol.

He has worked for more than 15 years as Information Technologies (IT) Project Management at central services of Galician Healthcare Service (SERGAS), a public institution which provides healthcare services to more than 2.700.000 citizens in Galicia.

He works in the deployment and development of innovative IT solutions at regional level: Telemonitoring System, Patient Portal, Big Data systems or Artificial Intelligence solutions.

All these projects are integrated to Electronic Health Record and ePrescription systems – IANUS -, currently deployed in 14 hospitals and more than 490 Primary Care Centres in Galicia.

Javier has lead as Programme Manager two large strategic innovation programs at Galician Health Service: “Hospital 2050” and “Innova Saúde”. Both projects run from 2011 until 2015, with a total funding of 90 M€, including 72 M€ from ERDF. (<http://www.sergas.es/Hospital-2050--Innova-Saude>). He has also participated in research activities in the field of computer assisted diagnosis and medical imaging (<https://orcid.org/0000-0001-5945-0178>)

He currently works in collaborative networks around eHealth, such as EIP-AHA or mHealth working groups, and participates in several National and EU projects focused on eHealth and public procurement of innovation topics, like Regions4Permed, Procure4Health, Tartaglia or Innovatrial
